

Phonics you teach from a script

A step-by-step phonics program with a private script for you, live letter tiles and handwriting for your learners, and a placement test that tells you where to start.

Classroom teachers

Tutors

Reading specialists

Homeschool parents

How a lesson works

1 • Teach

Model each sound and word; tiles light up as you tap.

2 • Build

Students build words with letter tiles.

3 • Write

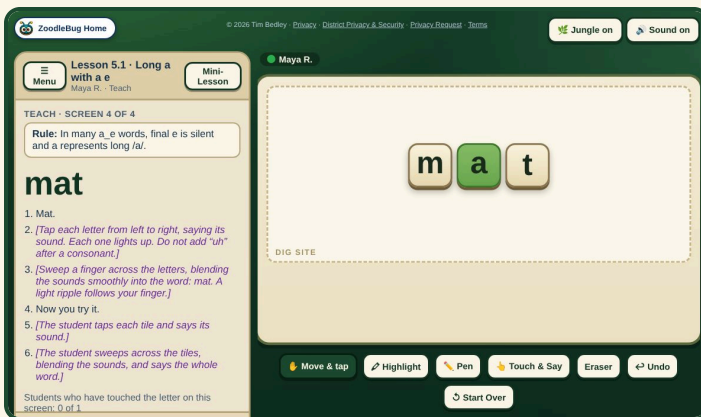

Students write the word by hand.

4 • Second Chance

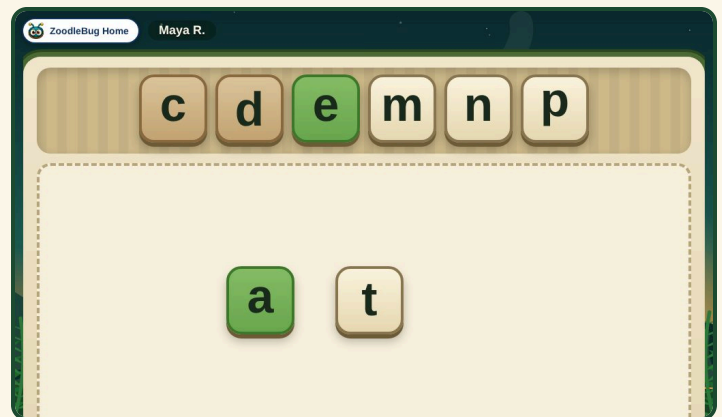

Hard words come back for another try.

5 • Read

Students read the list; you rate each word.

Your screen: a private script and a live view of the student's tiles.

The student's screen: big tiles to drag, tap and say.

Why teachers use it

1. **129 lessons** in 10 units, from letter sounds to vowel teams
2. **Mastery:** Got It, Challenging, Not Yet; anything not green comes back
3. **Review built in** to every lesson
4. **One-click joining:** a Join button lights up on each learner's home page
5. **Placement test:** the app suggests which lessons to do and skip
6. One learner or a group of 2 to 4, in a classroom, a tutoring room, at home or online

Get started

1. Sign up free at zoodlebug.com/start (teachers, tutors and homeschool parents verify free) and open DinoDecoder
2. Pick a student or group, then a lesson or the placement test
3. Learners tap the **Join** button that lights up on their ZoodleBug home page. One click and they are in.

Teaching with DinoDecoder is part of ZoodleBug Max **MAX**. Learners never pay and need no login of their own.
